
Certificate of Compliance / BPA (Bisphenol A)

January 5, 2026

This letter is Hartmann North America's Certificate of Compliance with respect to BPA.

Hartmann North America certifies that all of its moulded fibre egg cartons of the following designs: HartToP, HartVue and Hybrid, do not contain as intentional additives Bisphenol A (CAS# 80-05-71) and are not made using BPA.

Based on the information available to us from our raw material suppliers, Bisphenol A is not expected to be present. To the best of our knowledge, this material is not generated during production.

Once per year, composite samples of our products are collected and tested for Bisphenol A migration. Our products have been found to comply with the German Federal Institute of Risk Assessment (BfR), Recommendation XXXVI - Paper and board for food contact.

Any modifications to our carton specifications that affects this compliance will be communicated directly to you.

Sincerely,

Bruce Strecheniuk
Manager, Quality & Process Management
Hartmann North America
