

2025/40 EU regulation - Statement

2026.02.23

Valid to Hartmann European Production Units

Dear Customer,

Please be informed:

We have always paid close attention to PFAS and have been testing our products to ensure that they comply with the relevant regulations. Of course, we are aware that the 2025/40 EU regulation, which will come into force in August 2026, specifically addresses this parameter. We will have our product tests carried out this year in accordance with the new regulations (as well), the results of which will certainly be available by August, so that we can issue an updated statement on regulatory compliance in time.
